# Cautionary Statement

---

Certain statements contained herein regarding the Company and its operations constitute “forward-looking statements” or information. All statements other than statements of historical fact included in this presentation, including, without limitation, statements regarding future plans and objectives or expected results are forward-looking statements that are based on numerous assumptions that involve various risks and uncertainties inherent in the Company’s business, including risks related to mineral resource exploration and development. Actual results may vary materially from those described in the forward-looking statements. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from the companies’ plans or expectations include availability of capital and financing, general economic, market or business conditions, regulatory changes, timelines of government or regulatory approvals and other risks detailed herein and from time to time in the filings made by the Company with securities regulators. The Company makes all reasonable efforts to update its corporate materials, documentation and forward-looking information on a timely basis.

The inferred resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves. There is no certainty that these mineral resources will be realized. The reported mineral resources are not mineral reserves and do not have demonstrated economic viability.

# Overview & Objectives

Our objective is to build shareholder value through the acquisitions of advanced gold projects.

**Proven** management team

Business focused - Return On Investment driven

Strong geological advisory board

Excellent capital structure and liquidity

Interests in advanced stage resource property

Excellent exploration potential

# Our Management Team

---

## Greg Burns - CEO

Mr. Burns has extensive skills in all areas of exploration geology, office-based management, data interpretation, project appraisal and acquisition. He has over 22 years of corporate and technical experience in mineral exploration, and has held executive board positions with several prominent exploration and mining companies in Canada and Australia.

## Ken TollStam - Director

Mr. Tollstam, CPA, CA has spent a number of years at Deloitte Touche where he obtained his CA before going on to hold various Executive Management and Director of Finance positions throughout his career. Most recently Mr. Tollstam serves as director and chief financial officer of several private and publicly traded companies.

## Von Torres - Director

Mr. Torres brings experience in corporate management services to both private and public companies. Mr. Torres currently sits on the board and acts in a corporate secretarial role of multiple publicly traded companies.

## Quinn Field-Dyte - Director

Mr. Field-Dyte has over 10 years of experience in the financial industry, having served from 1996 to 2001 as an investment adviser and later as a consultant to Raytec Development Corp. He currently sits on the board of directors for numerous TSX Venture Exchange-listed companies in the metals and mining industry.

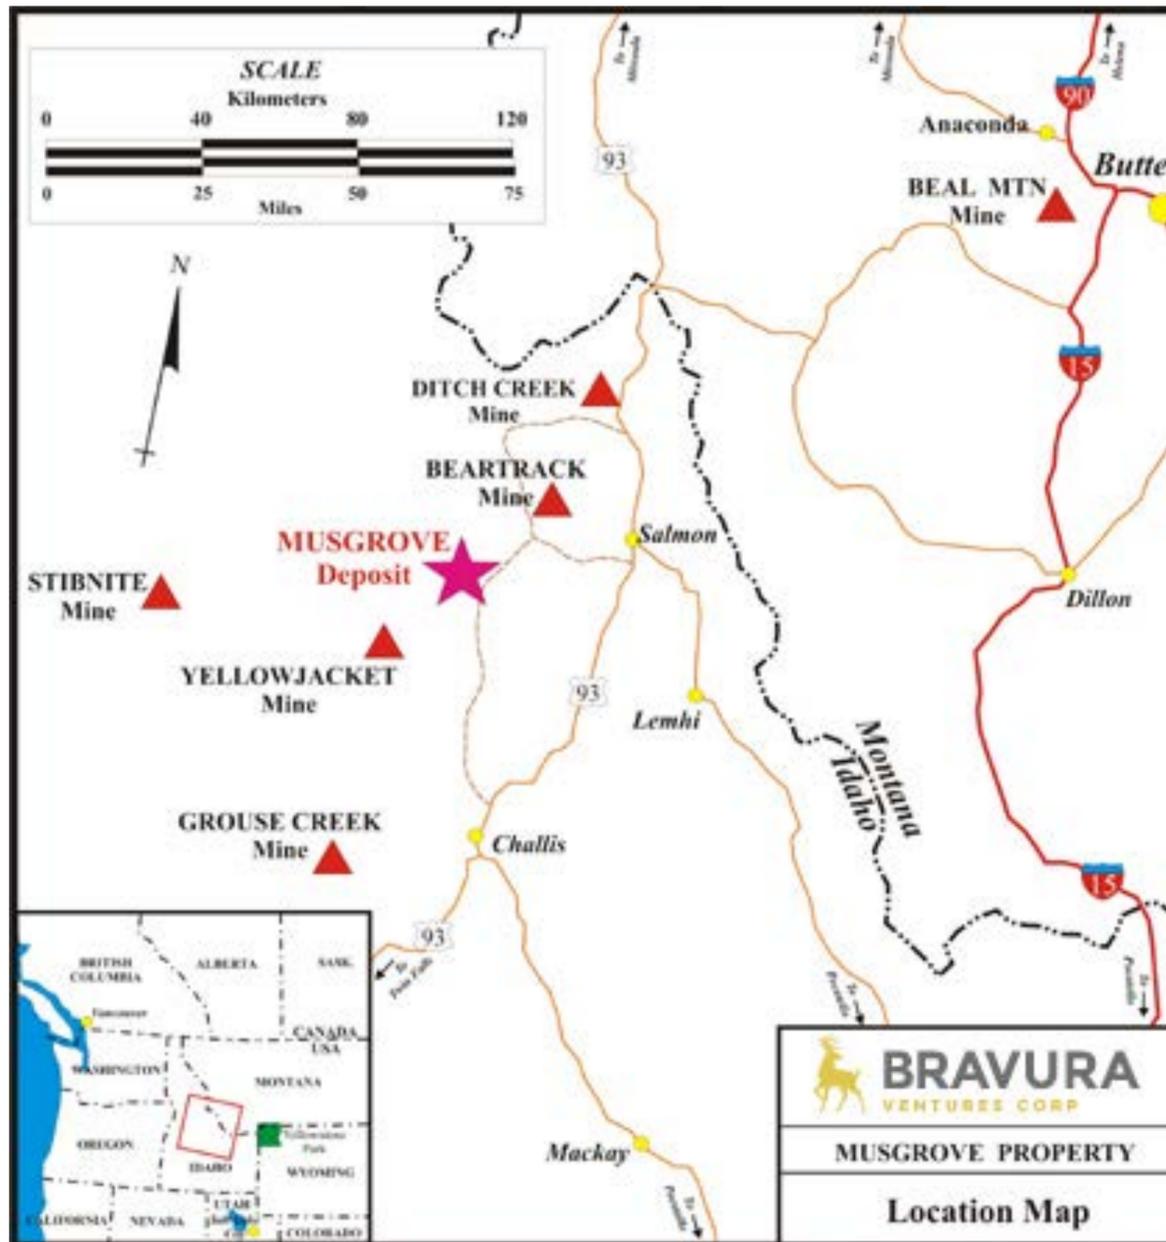

# Musgrove Creek Gold Project

A low cost, open pit gold opportunity looking to increase its resource

Musgrove Creek contains a historical NI 43-101 Inferred Mineral Resource estimate of **8 million tonnes** at 1.22 g/t Au (0.036 oz/ton) at a gold cut-off of 0.8 g/t (0.023 oz/ton).

This is equivalent to **313,822 oz (9,761 kg) of gold** at zero dilution (Gruenwald and Makepeace, 2004).

Recent exploration activity conducted at Musgrove has been focused on adding to that resource with the objective of establishing a minable deposit.

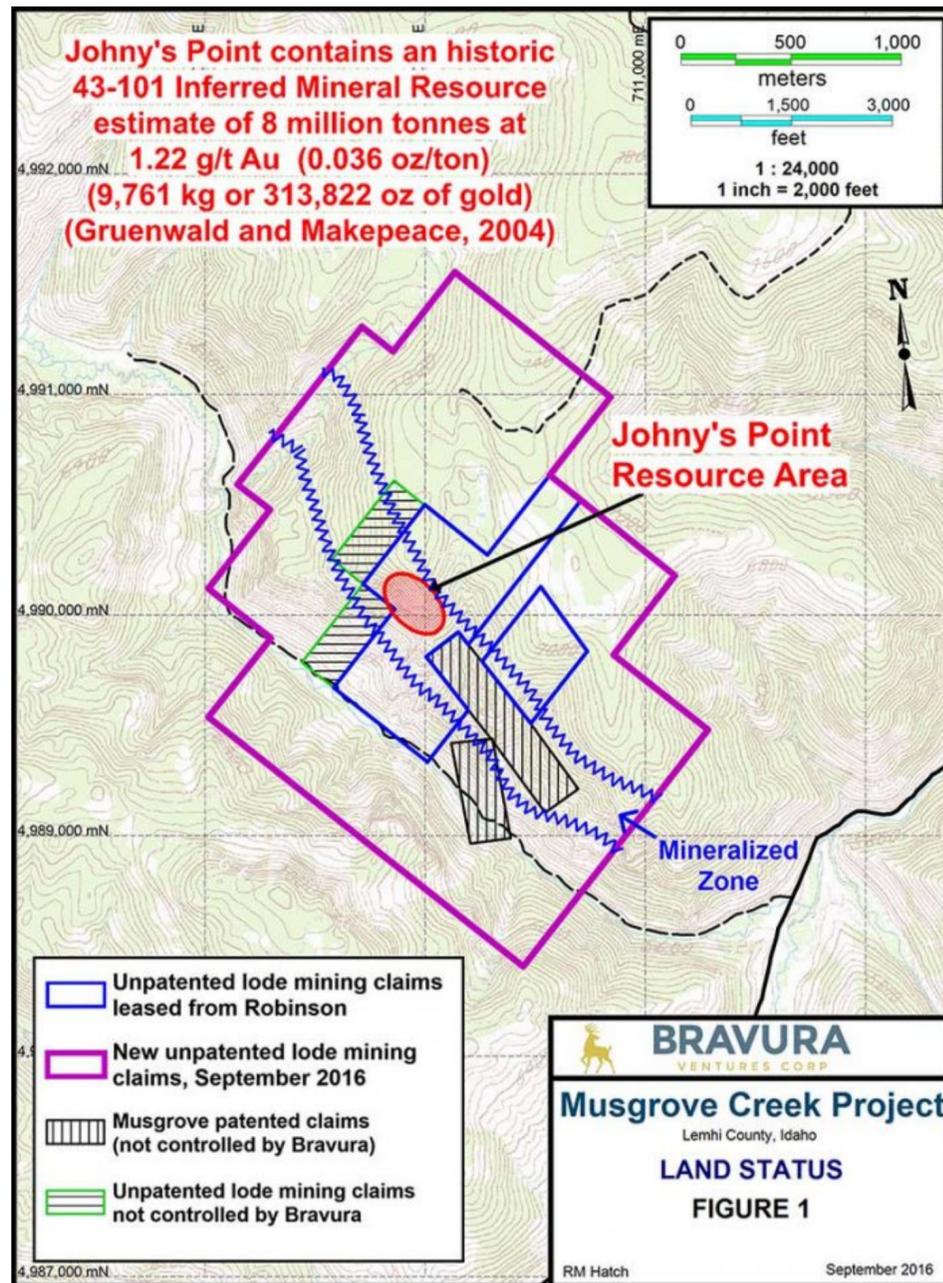

# Exploration Potential

The Property is one of many deposits that occur within the Challis Fault System

Geologically, Musgrove Creek has potential for a large low-grade epithermal gold deposit similar to the nearby Beartrack Mine.

The property is one of many mineral deposits that occur within a major northeast-southwest-trending structural zone known as the Trans-Challis Fault System.

These deposits include the Beartrack Mine and other historic producers to the northeast of the property, and Hecla Mining Co.'s Grouse Creek Mine and other past producers to the southwest.

# Share Structure (at August 30<sup>th</sup>, 2016)

---

**Issued & Outstanding:** 15,380,907

**Warrants:** 2,500,000

**Options:** 500,000 @.30

**Fully Diluted Total:** 18,380,907

**Current Stock Price:** \$0.47

Our objective is to build shareholder value and to establish ourselves as a developer of profitable projects by maximizing and expanding on the potential of the Musgrove Creek Gold Property.
